1. About OwnCal
2. OwnCal Privacy Policy
3. OwnCal Terms of Use

About OwnCal

OwnCal is a personal calorie, nutrition, and food tracking application published by Yoursware, an independent software publishing name operated by dr. Reza Adrian.

OwnCal was created around a simple principle: digital products should feel comfortable to use and meaningful to own.

When someone chooses to purchase an application, we believe the experience should not revolve around repeatedly paying simply to continue using the core product they already purchased.

For this reason, OwnCal is designed around a one-time purchase model without a recurring OwnCal subscription for the purchased version of the application.

Built for Everyday Nutrition Tracking

OwnCal is designed to help users organize and better understand their everyday nutrition.

Depending on the version of OwnCal and the capabilities available on your device, features may include:

- Daily calorie tracking
- Macronutrient tracking
- Food and meal logging
- Food diary
- Food search
- Custom food creation
- Custom recipes
- Serving and portion calculations
- Barcode scanning
- Nutrition label scanning
- Optical character recognition (OCR)
- Food database management
- Imported food databases
- Personal calorie goals
- Macronutrient goals
- Weight and progress tracking
- Nutrition history and trends
- Data backup, import, export, and restore
- Optional AI-assisted features
- Other tools related to personal nutrition and wellness tracking

Features may change, improve, or become unavailable over time because of technical requirements, device compatibility, operating system changes, third-party services, or application development.

Local-First by Design

OwnCal is designed around a local-first approach.

Your food diary, nutrition history, body information, custom foods, recipes, goals, and other personal tracking information are primarily stored on your device rather than in a personal cloud account operated by Yoursware.

You are therefore given greater direct control over your own information.

Certain optional online features, including AI-assisted functionality or third-party data lookup, may require limited information to be transmitted over the internet. When this happens, OwnCal will attempt to transmit only information reasonably necessary to provide the feature requested by you.

Optional AI Assistance

Some versions of OwnCal may offer optional AI-assisted functions through third-party artificial intelligence infrastructure, including OpenRouter and model providers available through OpenRouter.

AI features are intended to assist with tasks such as interpreting, organizing, reviewing, or estimating nutrition-related information.

AI-generated or AI-reviewed information can be incomplete, inaccurate, outdated, misleading, or incorrect.

AI should be treated as a convenience tool, not as an authoritative source of medical or nutritional information.

Users should review AI-generated results before saving or relying on them.

Nutrition Is Not Perfectly Measurable

Nutrition information should generally be understood as an estimate.

Values shown in OwnCal may originate from:

- Food packaging
- Manufacturer information
- Food databases
- Public datasets
- User-created foods
- User-imported data
- Barcode databases
- Recipes
- Serving calculations
- OCR
- AI-assisted interpretation
- Mathematical formulas
- Other third-party information sources

Actual nutritional content can differ because of manufacturing changes, serving size, preparation method, recipe variation, regional formulation, measurement error, database error, scanning error, or other factors.

OwnCal cannot guarantee that any nutritional value is completely accurate.

When accuracy matters, always check the original packaging, manufacturer information, or another authoritative source.

Health Disclaimer

OwnCal is intended for general informational, educational, nutrition tracking, and personal wellness purposes only. OwnCal is not a medical device and does not diagnose, treat, cure, or prevent any disease, medical condition, or health disorder.

Information provided by OwnCal does not constitute medical advice, diagnosis, treatment, or individualized professional dietary advice.

Calorie goals, energy expenditure calculations, macronutrient targets, weight projections, and similar calculations are estimates and may not reflect your actual physiological needs.

Do not rely on OwnCal to make decisions relating to:

- Medical treatment
- Medication
- Pregnancy or breastfeeding
- Diabetes management
- Kidney or liver disease
- Metabolic disorders
- Eating disorders
- Clinical nutrition
- Food allergy or anaphylaxis risk
- Food intolerance
- Ingredient safety
- Food contamination or food safety
- Any condition requiring individualized medical or nutritional management

If your diet is related to a medical condition or significant health concern, consult an appropriately qualified healthcare professional.

OwnCal is not an emergency service.

A Product You Can Make Your Own

OwnCal is built to provide a straightforward relationship between the user and the software.

Your purchase provides a personal license to use the purchased version of OwnCal according to its Terms of Use.

It does not transfer ownership of OwnCal's source code, brand, intellectual property, or separately released future products.

Our goal is simply to create software that respects the user's purchase, privacy, and ability to manage their own information without unnecessary complexity.

OwnCal Privacy Policy

Effective Date: 9 August 2026

Last Updated: 9 August 2026

OwnCal is published under the name Yoursware, a software publishing name operated by dr. Reza Adrian.

This Privacy Policy explains how information is handled when you use the OwnCal mobile application ("OwnCal", the "App", "we", "us", or "our").

We designed OwnCal around a local-first privacy approach. Most personal nutrition and tracking information is intended to remain stored on your device.

However, certain optional features may communicate with third-party services. These exceptions are described below.

1. Information You May Store in OwnCal

Depending on how you use OwnCal, the App may process information including:

- Age or age-related information
- Sex, where used for nutrition calculations
- Height
- Body weight
- Weight history
- Activity level
- Calorie targets
- Macronutrient targets
- Weight goals
- Food diary entries
- Meal history
- Food and beverage information
- Serving sizes
- Calories and nutrients
- Recipes
- Custom foods
- Barcode information
- Nutrition label information
- Notes
- Progress information
- Images voluntarily selected or captured for supported scanning features
- Other information you voluntarily provide

Some of this information may be sensitive in nature because it can relate to your body, nutrition, lifestyle, or health.

2. Local Storage

OwnCal is designed to store your personal nutrition database primarily on your own device.

This may include:

- Your food diary
- Body measurements
- Nutrition goals

- Recipes
- Custom foods
- Progress history
- Saved nutrition information
- Application preferences

Yoursware does not operate a personal OwnCal cloud account containing a remote copy of your entire nutrition diary unless a future feature explicitly states otherwise and this Privacy Policy is updated.

As a result, we normally cannot remotely view, restore, modify, or delete information that exists only inside your local OwnCal database.

3. Device Backup

Your operating system, device manufacturer, Google, or another platform provider may independently provide device backup or application restoration functionality.

Depending on your device settings and OwnCal's technical configuration, application data may potentially be included in system-level backup or restoration processes.

Such platform-level backup is separate from a cloud database operated by Yoursware.

Users should review the backup and privacy settings provided by their device or operating system.

4. Camera, Barcode and Image Processing

OwnCal may request access to your camera or images for functions including:

- Barcode scanning
- Nutrition label scanning
- OCR
- Other user-requested food recognition features

OwnCal will attempt to request only permissions reasonably necessary for the feature being used.

Where a feature can be performed locally, OwnCal may process the information directly on the device.

Where an optional online service is necessary, information required for the selected feature may be transmitted to that service as described in this Privacy Policy.

5. AI-Assisted Features and OpenRouter

OwnCal may provide optional AI-assisted functionality.

These functions may use OpenRouter, which provides access to third-party artificial intelligence model providers.

When you intentionally use an AI-assisted feature, OwnCal may transmit information necessary to process your request.

Depending on the specific AI feature, this may include:

- Text extracted from a nutrition label
- Food names
- Nutrition values
- Serving information
- User-entered text
- Structured information that requires AI review
- Images, only where a feature specifically requires image-capable AI processing

- Other content you intentionally submit to the AI feature

OwnCal should not automatically transmit your entire food diary, full nutrition history, body profile, or unrelated personal information merely because AI functionality exists.

AI transmission should occur only when reasonably necessary for the function requested by the user.

Important Privacy Notice About AI

Information sent to an AI service leaves your device.

It may be processed by:

4. OpenRouter; and/or
5. The third-party model provider selected or routed through OpenRouter.

The location, retention, logging, and processing practices of third-party model providers may vary.

Yoursware does not control the internal systems of independent third-party AI providers.

Where technically available and appropriate, Yoursware intends to use privacy-oriented routing and data minimization measures.

However, users should avoid submitting information to AI features that they consider highly confidential or unnecessary.

Do not intentionally include:

- Your full legal name
- Government identification numbers
- Financial information
- Passwords
- Authentication credentials
- Detailed medical records
- Information about other individuals
- Other unnecessary sensitive information

AI features are optional.

Users who do not wish to transmit information to external AI providers may choose not to use AI-assisted functions and may continue using applicable local OwnCal features.

6. AI Accuracy

AI models may generate incorrect or misleading information.

An AI response may:

- Misidentify food
- Misread a nutrient
- Misinterpret a serving
- Confuse units
- Produce inaccurate calculations
- Invent information
- Omit information
- Produce outdated information

OwnCal therefore treats AI output as assistance rather than verified fact.

Users should review information before saving or relying on it.

7. Third-Party Food and Barcode Services

Some OwnCal features may query third-party food, barcode, ingredient, or nutrition databases.

When you perform such a lookup, information such as a barcode, food search query, product identifier, language, region, or technical network information may be transmitted as reasonably necessary to complete the request.

Third-party services operate under their own privacy policies.

Yoursware does not control their independent data processing practices.

The list of third-party services used by OwnCal may change when services are added, replaced, or removed.

Material changes affecting personal data processing will be reflected in this Privacy Policy where required.

8. Information Imported by the User

OwnCal may allow users to import compatible food databases, backup files, recipes, nutrition records, or similar information.

Imported information is provided under the user's control.

Yoursware does not claim ownership over material lawfully imported by a user.

You are responsible for ensuring that you have the right to possess, use, and import the relevant content.

9. Exporting and Sharing Data

OwnCal may provide features that allow you to export, back up, save, or share information.

These actions are initiated by you.

Once information leaves OwnCal through an export or sharing function, it may become accessible to another application, storage provider, cloud provider, messaging application, or person selected by you.

Yoursware does not control services independently selected by the user.

10. Google Play and Purchases

If OwnCal is purchased through Google Play, your purchase is processed through Google's systems.

Yoursware does not receive your complete payment card information.

Google may independently process information related to:

- Your Google account
- Your device
- Payment processing
- Purchase verification
- Fraud prevention
- Licensing
- Refunds
- Google Play services

Google's processing is governed by Google's applicable policies and terms.

11. Application Diagnostics

Application stores, operating systems, and device platforms may provide developers with technical diagnostic information such as:

- Application version
- Device or operating system information
- Crash reports
- Error logs
- Performance information
- ANR information

Where such information is available to Yoursware, it will be used primarily for debugging, security, compatibility, and application improvement.

OwnCal should not intentionally place your food diary or sensitive nutrition information into crash logs.

12. Support Communications

If you contact us by email, we will receive the information you voluntarily provide.

This may include:

- Your email address
- Your name, if included
- Your message
- Screenshots
- Diagnostic information
- Attachments

Please avoid sending unnecessary health information or other sensitive personal information when requesting support.

Support communications may be retained for as long as reasonably necessary to resolve the request, maintain appropriate records, protect against abuse, or comply with applicable law.

13. Advertising and Sale of Personal Data

Yoursware does not sell your personal nutrition information.

OwnCal does not use personal food diary information for targeted advertising.

If this practice materially changes in a future version, the Privacy Policy and applicable user disclosures must be updated before the new processing occurs where required by law.

14. Data Retention

Information stored exclusively within OwnCal's local database normally remains on your device until you:

- Edit it
- Delete it
- Clear application storage
- Restore or replace a backup
- Remove the application
- Reset the device
- Otherwise remove the data

System-level backups may behave differently depending on your device and platform.

Information processed by third-party online services may be subject to their own retention practices.

Support communications held by Yoursware will be retained only for as long as reasonably necessary for their intended purpose, legal compliance, security, or dispute resolution.

15. Data Deletion

For information stored locally, you normally control deletion directly through OwnCal or your device settings.

Depending on available functions, you may:

- Delete individual records
- Delete diary entries
- Delete recipes or foods
- Reset the application database
- Clear OwnCal storage through Android
- Uninstall the App

Because Yoursware normally does not possess a server-side copy of your local database, contacting Yoursware cannot delete data that exists only on your device.

For personal information actually held by Yoursware, such as support correspondence, you may contact us using the details below.

Requests will be handled according to applicable law.

16. International Users and Data Transfers

OwnCal may be used internationally.

When you use an online third-party feature, information may be processed in a country different from the country in which you reside.

Data protection laws may differ between jurisdictions.

Where applicable law imposes requirements relating to international transfer or processing of personal information, we will take measures reasonably required of us under that law.

Independent third-party service providers remain responsible for their own legal and privacy obligations.

17. Privacy Rights

Depending on your location and applicable law, you may have rights concerning personal information, which can include rights to:

- Receive information about processing
- Access personal information
- Correct inaccurate information
- Delete certain information
- Restrict certain processing
- Object to certain processing
- Withdraw consent where processing is based on consent
- Obtain portable copies of certain information
- Lodge a complaint with an appropriate privacy authority

These rights are subject to applicable legal requirements and exceptions.

For locally stored OwnCal information, many of these actions can be performed directly within the App or through your device.

For information actually held by Yoursware, contact us at: dr.rezaadrianh@gmail.com

We may need to verify a request before acting on it.

We will not discriminate against users merely for exercising applicable privacy rights.

18. Sensitive Information

Nutrition, body measurements, weight history, dietary behavior, and related information can be sensitive.

OwnCal is designed to minimize unnecessary transmission of such information.

Where applicable law treats certain information as sensitive or health-related personal data, additional protections or consent requirements may apply.

Optional external processing should be limited to information necessary for the feature requested by the user.

19. Children and Minors

OwnCal is designed primarily for adults.

OwnCal is not intended to provide unsupervised calorie restriction, weight-loss targets, or dietary management for children.

We do not knowingly design OwnCal as a service directed specifically toward children.

A parent or legal guardian should supervise use by a minor where required by applicable law.

Children and adolescents with nutritional or weight concerns should receive appropriate professional guidance rather than relying solely on an application.

20. Security

OwnCal uses a local-first approach partly to reduce unnecessary exposure of personal information.

However, no software, device, network, or internet service can guarantee absolute security.

Users should protect their devices through measures such as:

- Device screen locks
- Operating system updates
- Secure device credentials
- Appropriate backup protection
- Encryption where available
- Avoiding untrusted applications
- Avoiding unnecessary sharing of exported files

21. Medical Disclaimer

OwnCal is intended for general nutrition tracking and wellness purposes.

OwnCal is not a medical device and does not diagnose, treat, cure, or prevent any medical condition.

Information in OwnCal should not replace professional medical or nutritional advice.

If you require medical advice, diagnosis, treatment, or individualized nutritional care, consult an appropriately qualified healthcare professional.

22. Third-Party Privacy Policies

Third-party services integrated into OwnCal operate according to their respective policies.

These may include, depending on the version of OwnCal:

- Google Play
- OpenRouter
- AI model providers accessed through OpenRouter
- Food or barcode information providers
- Operating system services
- Other services clearly disclosed when applicable

We encourage users to review relevant third-party privacy information before using optional online functions.

23. Changes to This Privacy Policy

We may update this Privacy Policy when:

- OwnCal changes
- New functionality is introduced
- Third-party services change
- Legal requirements change
- Privacy practices change

The "Last Updated" date will be revised when appropriate.

Where required by law, material changes will be communicated or consent will be obtained before materially different processing begins.

24. Contact

For privacy questions, requests, or concerns:

Publisher: Yoursware

Operator and Contact Person: dr. Reza Adrian

Application: OwnCal

Email: dr.rezaadrianh@gmail.com

Country of Operation: Indonesia

Yoursware is the software publishing name used by dr. Reza Adrian for OwnCal.

Please do not include unnecessary medical records, passwords, financial information, identification documents, or other highly sensitive information in support emails.

OwnCal Terms of Use

Effective Date: 9 August 2026

Last Updated: 9 August 2026

These Terms of Use ("Terms") govern your use of the OwnCal mobile application ("OwnCal" or the "App").

OwnCal is published under the name Yoursware, a software publishing name operated by dr. Reza Adrian.

For purposes of these Terms, the agreement is between you and dr. Reza Adrian operating under the publishing name Yoursware ("Yoursware", "Developer", "we", "us", or "our").

By purchasing, downloading, installing, or using OwnCal, you agree to these Terms.

If you do not agree, do not use OwnCal.

1. Purpose of OwnCal

OwnCal is a personal calorie, food, nutrition, and wellness tracking application.

OwnCal may provide tools including:

- Food logging
- Calorie tracking
- Macronutrient tracking
- Meal history
- Food search
- Custom foods
- Recipes
- Barcode scanning
- Nutrition label scanning
- OCR
- Food database functions
- Nutrition calculations
- Weight tracking
- Goal calculations
- Progress information
- Data import and export
- AI-assisted functions
- Related personal wellness features

OwnCal is intended primarily for personal informational and wellness use.

2. Not a Medical Device

OwnCal is not a medical device and does not diagnose, treat, cure, or prevent any disease, medical condition, or health disorder.

OwnCal does not provide:

- Medical diagnosis
- Medical treatment
- Professional medical advice
- Professional dietetic care

- Clinical decision support
- Emergency medical services

Information provided by OwnCal is not a substitute for consultation with an appropriately qualified healthcare professional.

3. Nutritional Information Is an Estimate

All nutritional information in OwnCal should be treated as an estimate unless independently verified by the user.

Information may originate from:

- Product packaging
- Manufacturers
- Food databases
- Barcode databases
- Public datasets
- User-created entries
- Imported information
- Recipes
- OCR
- AI systems
- Serving calculations
- Mathematical formulas
- Other third-party sources

Actual values may differ.

Differences may arise because of:

- Product reformulation
- Regional differences
- Preparation method
- Portion measurement
- Ingredient changes
- Recipe variation
- Laboratory variation
- Database error
- User input error
- OCR error
- Barcode mismatch
- AI error
- Calculation error

Yoursware does not guarantee that any nutritional value is completely accurate, current, or complete.

4. Calorie and Macronutrient Goals Are Estimates

OwnCal may calculate or display information such as:

- Estimated calorie requirements
- Energy expenditure
- Basal metabolic calculations
- Estimated maintenance calories

- Weight-loss targets
- Weight-gain targets
- Macronutrient goals
- Weight projections

These values are estimates.

Actual physiological requirements vary between individuals and may change over time.

OwnCal does not guarantee weight loss, weight gain, improved health, improved fitness, or any particular outcome.

5. User Responsibility

You are responsible for deciding whether information provided by OwnCal is appropriate for your circumstances.

Where accuracy matters, verify information using an authoritative source.

You should consult an appropriately qualified healthcare professional if you have:

- A diagnosed medical condition
- Pregnancy or breastfeeding
- Diabetes
- Kidney disease
- Liver disease
- Metabolic disease
- Significant underweight or obesity requiring clinical management
- Eating disorders or disordered eating
- Nutritional deficiencies
- Special dietary requirements
- Medication-related dietary restrictions
- Any health concern requiring individualized care

6. Allergy, Ingredient and Food Safety Warning

Do not rely on OwnCal as the sole source for determining whether a food is safe for:

- Food allergies
- Anaphylaxis
- Food intolerance
- Celiac disease
- Ingredient avoidance
- Religious dietary restrictions
- Medication interactions
- Food contamination
- Food spoilage
- Food safety

Database information, barcode information, OCR, AI interpretation, and manufacturer information may be incomplete, outdated, or incorrect.

Always check the original product packaging and obtain appropriate professional advice where necessary.

7. Barcode and OCR Disclaimer

Barcode scanning and OCR are convenience tools.

© 2026 dr. Reza Adrian / Yoursware. All rights reserved.

They may:

- Identify the wrong product
- Misread numbers
- Misread decimal separators
- Misread serving size
- Misidentify units
- Omit nutrients
- Combine incorrect values
- Fail to recognize information
- Return outdated information

You are responsible for reviewing scanned information before relying on or saving it.

8. Artificial Intelligence Features

OwnCal may provide optional features using artificial intelligence services, including OpenRouter and AI model providers available through OpenRouter.

AI-generated information may be inaccurate.

AI systems may:

- Hallucinate information
- Misinterpret input
- Return outdated information
- Produce incorrect calculations
- Misidentify food
- Misread nutritional information
- Omit relevant information
- Generate plausible but false information

AI output is not verified professional advice.

Users must review AI output before relying on it.

9. Third-Party AI Availability

AI functions depend on third-party infrastructure.

Yoursware does not control the permanent availability of:

- OpenRouter
- Individual AI models
- Individual model providers
- Provider pricing
- Provider rate limits
- Provider geographic availability
- Provider policies
- Provider capacity

AI functionality may therefore be temporarily unavailable, rate-limited, changed, replaced, restricted, or discontinued where reasonably necessary.

A temporary or permanent change to a third-party-dependent AI feature does not automatically make the rest of OwnCal unusable.

10. One-Time Purchase

OwnCal is offered under a one-time purchase model unless a different transaction is clearly disclosed before purchase.

Purchasing OwnCal does not create a recurring subscription to the purchased version of OwnCal.

The purchase grants you a license to use the version of OwnCal made available under that purchase according to these Terms.

11. What a One-Time Purchase Does Not Guarantee

A one-time purchase does not guarantee:

- Perpetual active development
- Updates forever
- Support forever
- Compatibility with every future Android version
- Compatibility with every future device
- Permanent availability of third-party APIs
- Permanent availability of AI models
- Unlimited third-party API consumption
- Free access to separately released future products
- Free access to a future independently sold major product
- Permanent availability from Google Play or another application store

Nothing in this section removes rights that cannot legally be excluded under applicable consumer law.

12. Reasonable Limits on Network-Dependent Features

Certain optional online functions may generate ongoing infrastructure or third-party processing costs.

Yoursware may apply reasonable:

- Rate limits
- Usage limits
- Abuse prevention
- Fair-use controls
- Provider changes
- Model changes
- Technical restrictions

to online or AI-dependent functionality where reasonably necessary to maintain availability, security, or sustainability.

Such limits do not convert the purchased core application into a recurring subscription.

13. Software License

Subject to these Terms, you receive a limited, personal, non-exclusive, non-transferable license to use OwnCal for lawful personal use.

You do not acquire ownership of the OwnCal software itself.

14. Intellectual Property

OwnCal's original:

- Source code

- Application architecture
- User interface
- Branding
- Name
- Logos
- Icons
- Graphics
- Written documentation
- Original database structure
- Application assets
- Other original creative material

remain the intellectual property of their respective rights holder, including dr. Reza Adrian / Yoursware where applicable.

Except where permitted by applicable law or an applicable open-source license, you may not:

- Copy the software
- Redistribute unauthorized copies
- Sell unauthorized copies
- Circumvent purchase protection
- Remove copyright notices
- Misrepresent OwnCal as your own product
- Extract and commercially redistribute proprietary OwnCal assets

15. Third-Party Copyright and Database Rights

OwnCal may interact with or display information originating from third parties.

This may include:

- Product names
- Food information
- Manufacturer information
- Barcodes
- Nutrition information
- Public datasets
- Government datasets
- Open datasets
- User-imported databases
- Other third-party information

Ownership and rights in third-party material remain with the applicable rights holders.

The presence of information inside OwnCal does not mean Yoursware claims ownership over that third-party material.

Different datasets may be subject to copyright, database rights, attribution requirements, open-data licenses, contractual restrictions, or other legal conditions.

16. User-Imported Content

Where OwnCal allows you to import a database or other content, you are responsible for ensuring that you have the lawful right to possess and use that material.

The technical ability to import a file does not mean that Yoursware has verified its copyright or licensing status.

You must not use OwnCal to unlawfully reproduce or distribute protected databases or copyrighted material.

17. User-Created Information

You retain rights you lawfully hold in content you create or enter into OwnCal.

You grant OwnCal only the technical permissions reasonably necessary to process your information to provide functions you intentionally request.

Where you intentionally submit information to an online or AI function, the information may need to be processed by relevant service providers to complete that request.

18. Trademarks and Product Names

Food brands, company names, product names, trademarks, logos, and similar identifiers belong to their respective owners.

Their appearance in OwnCal does not imply:

- Sponsorship
- Partnership
- Endorsement
- Authorization
- Affiliation

unless expressly stated.

19. Open-Source Software

OwnCal may contain open-source software components.

Such components remain subject to their applicable open-source licenses.

Where required, relevant license notices and attribution should be made available within the App or accompanying documentation.

20. Copyright or Intellectual Property Complaints

If you believe material distributed directly by OwnCal infringes rights you own, you may contact: dr.rezaadrianh@gmail.com

Please identify:

- The material concerned
- The rights you believe are affected
- Where the material appears
- Your contact information
- Sufficient information for us to review the request

We may request additional information where reasonably necessary.

21. Local Data and Backups

OwnCal primarily stores personal tracking information locally.

You are responsible for maintaining backups you consider important.

Yoursware may be unable to recover information lost because of:

© 2026 dr. Reza Adrian / Yoursware. All rights reserved.

- Device loss
- Device damage
- Storage corruption
- Operating system failure
- Application deletion
- Clearing application data
- Failed backup
- Failed restoration
- User error
- Device migration
- Circumstances outside our reasonable control

22. Third-Party Services

OwnCal may rely on third parties for functions including:

- Application distribution
- Payment processing
- Licensing
- Artificial intelligence
- Food information
- Barcode lookup
- Operating-system functions

Third-party services are outside our complete control.

Their functionality, availability, pricing, policies, and technical systems may change.

23. Google Play

If you purchase OwnCal through Google Play, certain matters are also governed by Google's applicable terms and policies.

These may include:

- Billing
- Purchase processing
- Authentication
- Licensing
- Refund procedures
- Application distribution

Nothing in these Terms is intended to override mandatory terms imposed by the platform through which OwnCal was lawfully acquired.

24. Refunds

Refunds may be processed according to:

- The policies of the application store through which OwnCal was purchased; and
- Mandatory consumer protection laws applicable to the transaction.

Nothing in these Terms removes refund or consumer rights that cannot lawfully be excluded.

25. No Guaranteed Availability

We aim to maintain OwnCal but cannot guarantee uninterrupted or error-free availability.

OwnCal or individual features may be affected by:

- Bugs
- Device incompatibility
- Android changes
- Security requirements
- Provider outages
- Internet availability
- API changes
- Third-party policy changes
- Database changes
- Force majeure
- Other circumstances outside reasonable control

26. Updates and Modifications

Yoursware may update OwnCal for purposes including:

- Bug fixes
- Security
- Compatibility
- Performance
- User experience
- Legal compliance
- Third-party compatibility
- Feature improvement

Features may occasionally be modified or removed where reasonably necessary.

27. No Warranty of Perfect Accuracy

To the maximum extent permitted by law, Yoursware does not warrant that:

- Nutrition information is perfectly accurate
- Every food exists in the database
- Every barcode is correct
- OCR is error-free
- AI is accurate
- Third-party databases are accurate
- Calorie targets reflect exact biological needs
- Weight predictions will occur
- All services will always be available
- OwnCal will be completely free of software errors

28. Limitation of Liability

To the maximum extent permitted by applicable law, Yoursware and dr. Reza Adrian will not be liable for indirect, incidental, special, consequential, exemplary, or similar damages resulting from use of or inability to use OwnCal.

This includes, where legally permitted, losses associated with:

- Incorrect nutritional information
- Barcode errors

- OCR errors
- AI errors
- Database errors
- User input errors
- Food decisions
- Loss of application data
- Device problems
- Third-party service failure
- Unavailable online features
- Reliance on estimated calculations

To the maximum extent permitted by applicable law, any aggregate monetary liability arising directly from OwnCal will not exceed the amount you actually paid to purchase OwnCal.

This limitation does not apply where such limitation is prohibited by applicable law.

Nothing in these Terms excludes or limits liability that cannot lawfully be excluded, including mandatory consumer protections or other non-waivable statutory rights.

29. No Professional Relationship

Use of OwnCal does not create a:

- Doctor-patient relationship
- Dietitian-patient relationship
- Nutritionist-client relationship
- Healthcare professional relationship
- Fiduciary relationship

between you and Yoursware, dr. Reza Adrian, an AI provider, or any other third-party provider.

The fact that the operator of Yoursware has a medical professional background does not transform OwnCal into medical care or individualized medical advice.

30. Emergency Situations

OwnCal is not designed for emergencies.

Do not use OwnCal to obtain emergency medical assistance.

If you believe you are experiencing a medical emergency, contact an appropriate local emergency service or healthcare provider.

31. Acceptable Use

You must not:

- Use OwnCal unlawfully
- Circumvent licensing systems
- Redistribute pirated versions
- Intentionally compromise the App
- Use the App to distribute unlawful content
- Abuse online services
- Deliberately overload third-party APIs
- Use automated systems to consume unreasonable API resources
- Attempt unauthorized access to infrastructure
- Impersonate Yoursware or its operator

32. Age and Minors

OwnCal is intended primarily for adults.

Use of calorie restriction or weight-management functionality by minors should occur only with appropriate supervision and professional guidance where necessary.

If local law requires parental or guardian consent for use by a minor, that requirement applies.

33. International Use

OwnCal may be made available internationally.

You are responsible for using the App consistently with laws applicable to you.

Some features may not be available in every country because of:

- Laws
- Regulations
- Provider restrictions
- Database availability
- Technical requirements

34. Governing Law

These Terms are governed by the laws of the Republic of Indonesia, subject to mandatory legal protections that may apply to users in another jurisdiction.

If the law where you reside grants consumer rights that cannot legally be waived by contract, those rights remain unaffected.

35. Dispute Resolution

If a dispute occurs, you and Yoursware should first attempt to resolve the matter through reasonable good-faith communication.

Contact: dr.rezaadrianh@gmail.com

If a dispute cannot be resolved informally, either party may use dispute-resolution procedures or courts available under applicable law.

Nothing in these Terms prevents a consumer from using mandatory dispute mechanisms or courts available to them where such rights cannot lawfully be restricted.

36. Severability

If any part of these Terms is determined to be invalid or unenforceable, the remaining provisions will continue to apply to the maximum extent permitted by law.

37. No Waiver

Failure to enforce a provision of these Terms does not automatically waive the right to enforce it later.

38. Changes to These Terms

These Terms may be updated where reasonably necessary because of:

- Changes to OwnCal
- New functionality
- Security requirements
- Third-party services

- Legal requirements
- Platform requirements

Material changes will be communicated where required by applicable law.

Updated Terms will not retroactively eliminate statutory rights that cannot lawfully be removed.

39. Entire Agreement

These Terms, together with the OwnCal Privacy Policy and mandatory terms of the platform through which OwnCal is distributed, form the agreement governing use of OwnCal.

40. Contact

Application: OwnCal
